

TQS creates custom medical products with one purpose – to help keep our troops, law enforcement personnel and first responders alive. All our medical products come ready-to-use with a complete complement of medical equipment custom designed to fit your specific needs. TQS uses only experienced and trained personnel for all its product development, testing and manufacturing. We stand by every product with quality, honor and integrity – the hallmarks of our philosophy. If you do not see it in our product line, we will make it for you.

WHEREVER HONOR AND DUTY CALL

1.800.374.5137 www.tqsresponse.com

MADE IN THE USA

Our Mission

In 2001, the founders of Tier-One Quality Solutions recognized that worldwide events changed perceptions of conventional military and law enforcement response. Within federal government and law enforcement agencies, local and state governments, and friendly nations all over the world, there became an increased need for products, services, and training that would meet the challenges brought on by those events. In 2003, TQS opened to meet that need.

Tier-One Quality Solutions is a company owned by Military Veterans. Since our inception, we continue to grow in size and service in response to the dramatic growth and demand in the military product and service industry. The TQS Business Development Team is primarily composed of retired military and law enforcement personnel who have proudly served in special operations and in the national and international security community as well. Our experience and commitment is reflected in our philosophy – “Wherever Honor and Duty Call.”

The TQS mission is to provide our customers with the finest state-of-the-art individual and small unit equipment to enhance their safety, improve their response quality, and increase their combat effectiveness. With the ability to provide custom-designed products supported by innovative logistics solutions, TQS is truly taking tactical equipment procurement and logistics support to the next level. Our company values – the highest level of professionalism fueled by teamwork, communication, education, accountability, and quality service - result in a proven track record of delivering “best value” to customers all over the world.

TQS Corporate Office

Logistic Solutions

Current clients include:

- The Department of Defense
- The State Department
- The Department of Homeland Security
- Federal law enforcement agencies
- Local and state governments
- Allies from all over the globe

Our Contract Advantages

In addition to TQS's exclusive product line, we have access to many manufacturers and products to meet every client's need. TQS provides competitive pricing to further streamline any GSA procurement process our client's may require.

GSA Contract Advantages:

- Pre-determined fair and reasonable pricing, with quality assurance and quality products
- Purchase anytime or anywhere using credit cards, GPC Card/IMPAC Card, electronic requisitioning, the internet, or by contacting TQS directly
- Research products and compare pricing over the Internet before purchasing when using GSA Advantage

TQS MILITARY BANDAGE KITS ("MBK")

TQS Military Bandage Kits ("MBK") are the foundation of casualty care. These kits enable every War Fighter, First Responder, or Law Enforcement Personnel member to address the critical requirements of proper Tactical Combat Casualty Care (TCCC). When used in conjunction with TCCC, these kits give the individual the power to decrease preventable causes of death. Choose one of the following kits used by the various military services, or have one custom-built to suit your own individual needs.

Features:

Vacuum sealed, environment and weather resistant tactical response kit comes standard in lightweight nylon desert tan zippered pouch.

Options: MBK Molle System Vest Pouch
Drop Leg Pouch (NEW)

Educational and Training Services

Tactical Combat Casualty Care (TCCC) is a hands-on method of instruction specifically developed for those individuals requiring special tactics and/or immediate trauma skills when battlefield, remote care, transport, or unique rescue and/or environmental conditions exist.

Who benefits from TCCC? Everyone benefits from TCCC from the first responder with no previous medical training to the most experienced emergency medical provider. This is due to TCCC's concentration on treatment of the trauma casualty/patient with particular emphasis on penetrating, blunt, and blast trauma in conjunction with environmental concerns.

TCCC focuses on Self-Aid and Buddy-Aid for the Special Operations Operator, Infantry Soldier / Marine, Forward Support, and Tactical Law Enforcement personnel. This course requires no previous medical training. TCCC teaches you to train the way you operate.

Preventable Death in Ground Combat Casualty Care Tactical Combat Casualty Care

Tier-One Quality Solutions is proud to announce the partnership with Assessment & Training Solutions (ATSCC) in providing Tactical Combat Casualty Care training to all Military, Civilian and Law Enforcement Personnel. Please find more information about this invaluable training at www.tacc.net

MBK MOLLE Vest Pouch

Item # TQS-VP-(COLOR CODE)

The popular MOLLE Vest Pouch offers a compact, versatile option to house any one of the Military Bandage Kits offered by TQS. Offered in a variety of colors to blend with virtually any combination of tactical gear, the Vest Pouch, in addition to the MBK, is a necessity in every extreme environment.

Drop Leg Pouch

Item # TQS-DLP-(COLOR CODE)

Our latest edition to the TQS Product Family is the TQS Drop Leg Pouch. This pouch was designed to accommodate ANY of the TQS Military Bandage Kits ("MBK"). This pouch features two individual external pockets with Velcro flap closures to accommodate various items an operator may need for rapid deployment, such as a TQS M.E.T. Tourniquet. Inside, the TQS Drop Leg Pouch offers two individual pockets for division of various Trauma Gear featured in the TQS Military Bandage Kits.

TQS M.O.U.T. Bag

Item # TQS-TMOB-U-(COLOR CODE) w/o content
TQS-TMOB-L-(COLOR CODE) w/ contents

Interior packing system allows for multiple vertical configurations for storage of medical equipment. Interior lid pockets are designed to hold standard size NATO morphine auto injectors and quick-look medical reference materials. Exterior side pockets are designed to hold hemostatic agents such as Chitosan or QuikClot, and the Asherman Chest Seal. Breakaway attachment system allows for multiple methods of mounting without vehicle modification; extension straps are included. Each bag can be utilized as an independent mobility kit however these bags easily attach to another vertically forming a medical supply bundle that can be quickly dropped from a CASEVAC or assault helicopter. Exterior clear view lid pocket and optional color variance provide rapid visual identification of kit contents. Attachable sling strap allows for individual emergency carry when necessary.

Rapid Re-supply Bag "Pancake Bag"

Item# TQS-PNCK -(COLOR CODE)

This TQS Bag was built with Special Operations and large military operations in mind. Offering the largest available space of any TQS bag, The "Pancake Bag" allows for the individualization of medical equipment. With its divided interior and deep compartments, there is not much that this bag cannot handle. Designed with optional color coded handles and webbing, these bags can be built as a medical re-supply or segregated into trauma priorities such as Circulation, Airway/Breathing, Fractures, etc.

Features:

Divided interior for multiple configurations

Weather resistant zipper

Mountable backing for rapid attachment and deployment of bag from virtually any mobility platform

Vertical Velcro system allowing for multiple bag attachment

Backpack straps for easy transport

TQS Duffle Bag – Large

Item # TQS-D-LG-(COLOR CODE)

From the outside, the TQS Duffle looks just like a regular duffle bag. Open it up and the difference becomes apparent. With a divided, spacious main compartment, this bag offers room for an assortment of gear. The lid features a detachable zippered kit with individual leaves and elastic securing straps for a variety of items such as tools, instruments, or trauma items. The exterior offers two large side compartments and a front compartment for any additional space needed.

Features:

Carrying handles and shoulder strap

Interior divider can be removed or adjusted for multiple configurations

Detachable lid organizer

TQS Military Emergency Tourniquet

Military Emergency Tourniquet (M.E.T.)

Developed specifically with the military in mind, the Military Emergency Tourniquet (M.E.T.) is a true one-handed tourniquet that can be applied within seconds by an appropriately trained soldier, even while using the non-dominant hand. A simplistic one-time use device, the M.E.T. does not rely on Velcro or multiple small mechanical components to lock. The M.E.T. is not inhibited by mud, blood, saltwater corrosion or fine granular sand. Its unique non-slip backing prevents the M.E.T's pull strap from backing out after being pulled through the windlass and buckle.

AIRWAY AND BREATHING MANAGEMENT

Military Thoracic Kit

Item # TQS-MTK

The TQS individual Tactical Military Thoracic Medical Kit, vacuum sealed, environment- and weather-resistant tactical first responder kit comes in a protective, nylon, zippered pouch.

Contents:

- 2 Chest Tubes 36fr
- 2 Heimlich Valves
- 1 10cc syringe with 18 gauge needle
- 1 Forceps - Curved Kelly - 5.5"
- 1 Forceps - Hemostat 8"
- 1 Scalpel No. 10
- 2 Suture Kits / 2 Nylon Double Needle
- 6 Betadine Swabs
- 8 4x4 Gauze, Non Sterile
- 2 Petroleum Gauze - 3" x 36"
- 1 Pair Gloves, Non Sterile
- 2 Sterilization Wrap

Emergency Chest Seal

Item # TQS-ECS

Exclusive to TQS, the Emergency Chest Seal is a sterile occlusive dressing for treating open pneumothorax, and for preventing tension pneumothorax in chest injuries from gunshots, stab wounds, or other penetrating chest trauma. This occlusive dressing features a larger disk allowing more surface area coverage and a unique oneway, 3-valve dome allowing air to escape and not re-enter the chest. This patented rigid dome promotes the escape of air from the chest even if the Chest Seal is covered by gear or rests against a hard surface.

ENVIRONMENTAL MANAGEMENT

HEET-Bivy

Item # TQS-HEET-Bivy

The HEET-Bivy is specifically designed to lay flat and folded for quick attachment and application to a spine board, litter, or basket carry device. The centerline velcro system allows for complete access when necessary. The reflective inner layer retains and transfers body heat for passive re-warming, while heater pockets allow for active warming. Its water- and wind-resistant shell prevents further loss to the elements, yet is strong enough to withstand tearing when placed over an individual in full clothing, equipment or other warming devices such as a sleeping bag during patient transport, making it a perfect device for ski patrol rescues. Use individually or in conjunction with other HEET-Medical products. All HEET products have been designed to fit a variety of active warming options.

HEET-Medical Garment

Item # TQS-HEET-MG

Specifically designed for the prevention and treatment of Hypothermia for US Special Operations, the "Hypothermia, Environmental, Exposure & Trauma (HEET) Garment" combines the proven effectiveness of heat reflective technology with the medical, mobility, and durability requirements while surviving the cold. Made of a lightweight, compact, highly durable, dual-layered material, the garment's reflective inner layer retains and transfers body heat for passive re-warming, while six strategically placed pockets hold a variety of chemical heater options for active warming. The water- and wind-resistant shell prevents further loss to the elements, yet is strong enough to resist tearing or ripping during patient transport in the harshest of environments. The HEET-Medical provides complete coverage of the torso at all times. Worn as a jacket, it cannot be blown off during transport, but is versatile enough to be opened flat for pre-attachment to a spine-board or litter. A series of Velcro closures provides access to any area of the body without exposing other areas to ambient air. Completely functional, the HEET-Medical can be worn from incident to surgery without inhibition of care. Its easy access to heater pockets allows for continual replacement of active heat devices on prolonged transport, or allows for ventilation of a single compartment for the release of excess heat. Combine with the HEET-Medical Trousers for complete body coverage and access to legs, feet, and groin.
